Business Philosophy The firm maintains a commitment to providing unique and affordable solutions to clean air and pneumatic conveying challenges.

Established in 1993, CAMCORP is a clean air management company specializing in creating unique design and engineering approaches for industrial applications. The firm has a full array of technical, engineering, construction and aftermarket services for virtually every application need.

Company experts have experience in the latest filtration and pneumatic conveying technologies, and have engineered unique solutions for a wide range of industrial situations.

The company is owned by Frank B. Handwork, a veteran of the "clean-air" industry. Frank has been involved with designing, selling and servicing air filtration and pneumatic conveying systems since starting his career in 1962 with one of industry's pioneer firms. His industry experience includes positions in sales, engineering, customer service, customer support and management.

Today, he oversees all aspects of the company's operations along with a management team with over 80 total years experience in the industry.

In-House Manufacturing

Camcorp is able to monitor and control the majority of its output through its wholly-owned production facility located in Willow Springs, MO. The 44,000 square foot facility, located on a 7.5 acre developed plot, opened in January 1999, designed and equipped with state-of-the-art manufacturing and material handling equipment. Welders and fabricators are AWS or ASME certified.

Raw Material Capabilities

- Carbon Steels
- Stainless Steels
- Austenitic Alloys
- Aluminum
- Chrome Moly Alloys

To Our Customers:

This manual was created with your needs in mind. It is designed to assist you by providing you up-to-date information on CAMCORP'S current slate of products and services.

We hope you will reach for it to find immediate answers to your questions related to our baghouse dust collection systems, element/cartridge filters, pneumatic conveying systems, component parts and related information. Should you have any questions about our products, services, or an application challenge, call us at the number shown above. We promise to respond promptly to your inquiries, to give you straight answers about your needs, and to provide honest estimates of time frames and associated costs.

Your air filtration and pneumatic conveying needs are ever-changing, and we promise to continue to find new, affordable solutions to your clean air processing challenges. As our products and services change, we will update and supplement this manual. We invite you to call us to share your ideas on ways we can improve it and our service to you.

Thank you for your interest in our company and services.

Sincerely,

Frank B. Handwork
President

Key Products/Services

- Baghouse Dust Collection
- Element/Cartridge Filtering
- Pneumatic Conveying Systems
- Component/Parts

Industry Sectors Served

- Agricultural
- Architects
- Beverage
- Cement
- Chemicals
- Engineering
- Feed & Seed
- Food
- Manufacturing
- Mining
- OEMs
- Pet Food
- Petro-chemicals
- Pharmaceuticals
- Rock & Quarry
- Woodworking
